

## SHIPPING LITHIUM POLYMER BATTERIES

The Terraview RangePro X8 series of batteries, RP6S24KHDx are considered **Class 9 Hazardous Material** and must be shipped accordingly per UN3480. These are very strict regulations regarding shipment of batteries containing lithium.

## KEEP THE SHIPPING MATERIAL THAT SHIPPED WITH THE BATTERIES!

When shipping these batteries for returns to Terraview or another third-party, the following basic requirements must be met:

1. The shipping box must meet the U3480 regulation. The packaging in which the batteries shipped is appropriate and approved.
2. For Class 9 Hazardous Materials under UN3480, the following label must be present on the shipping container:

- The capacity of these batteries does not allow for shipping on passenger aircraft. The following label must also be present on the shipping container when shipping via air. When shipping ground, this label is not required.

- Finally, UN3480 covers shipping Lithium batteries shipped by themselves. To indicate this on the packaging, the following label is also required. The shipper's phone number should be included on the label.

**IF YOU ARE NOT PROPERLY TRAINED AND REGISTERED AS A HAZARDOUS MATERIAL SHIPPER CONSULT A LOCAL SHIPPING AGENCY SUCH AS FEDEX OR UPS.**
